

# Adult Care Worker Level 2 End Point Assessment Process

The learner will be assessed to the apprenticeship standard using two complementary assessment methods. The assessment is synoptic, i.e. takes a view of the overall performance of the learner in their job.

The assessment activities will be completed as follows:

## Situational judgement test

- The situational judgement test will present the learner with a range of real-life scenario questions which will be in a multiple choice format. The learner will have to answer 60 questions which will draw from the stated knowledge and behaviours element of the standard.

## Professional discussion

- The discussion will be 45 minutes
- To be completed after the situational judgement test has been achieved.
- The discussion will draw questions and amplifications from prior learning and experience including, where applicable, the learner's self-assessment and supporting evidence including testimony from users of services
- The discussion will include some standardised set questions asked of every learner

## Completion

Independent End Point Assessor confirms that each assessment element has been completed. The overall grade is determined by the Independent End Point Assessor based on the combination of performance in all assessment activities.
